<p>THE REPLY FILED <u>06 November 2006</u> FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.</p> <p>1. <input checked="" type="checkbox"/> The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:</p> <p>a) <input type="checkbox"/> The period for reply expires _____ months from the mailing date of the final rejection.</p> <p>b) <input checked="" type="checkbox"/> The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).</p>			
<p>NOTICE OF APPEAL</p> <p>2. <input type="checkbox"/> The Notice of Appeal was filed on _____. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).</p>			
<p>AMENDMENTS</p> <p>3. <input type="checkbox"/> The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will <u>not</u> be entered because</p> <p>(a) <input type="checkbox"/> They raise new issues that would require further consideration and/or search (see NOTE below);</p> <p>(b) <input type="checkbox"/> They raise the issue of new matter (see NOTE below);</p> <p>(c) <input type="checkbox"/> They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or</p> <p>(d) <input type="checkbox"/> They present additional claims without canceling a corresponding number of finally rejected claims.</p> <p>NOTE: _____. (See 37 CFR 1.116 and 41.33(a)).</p> <p>4. <input type="checkbox"/> The amendments are not in compliance with 37 CFR 1.121.  LANNA MAI SUPERVISORY PATENT EXAMINER TECHNOLOGY CENTER 3600			

Art Unit: 3637

1. This Office communication is in response to the After-Final Reply filed on 11/06/2006.
2. In response to applicant's arguments on page 2 regarding the claim objections stated in the Final Office action mailed 9/5/2006, applicant is reminded that according to 37 CFR 1.121(c)(2) any brackets placed before and after a character is used to denote deletion of said character; therefore, the placing brackets before and after the word "a" in claim 10, line 1 of the Amendment filed on 6/21/2006 denotes that a deletion of this word, thus the objection to the claim stands.
3. In response to applicant's arguments regarding the definiteness of the term "continuously" selectively positionable, the examiner takes the position that the disclosure has supported for the claimed of the modular stanchions "selectively positionable" at a plurality of points within the confines of the pallet base, there is no support in the disclosure, whether expressly or inherently, of "continuously" selectively positionable, and it is not clear what the metes and bounds of "continuously" selectively positionable.
4. In response to applicant's arguments regarding the rejection under 35 U.S.C. 103 of Soderberg, although Soderberg does not teach using adhesive for securing the stanchions to the pallet base, as stated in the above claimed rejection, it is well known in the art to use various, well known equivalent and commercially available securing means, such as screws, bolts, nails, magnets and adhesive layer to secure one object to another as a matter of engineering choice; therefore, it would have been obvious and well within the level of one skill in the art to modify the structure of Soderberg et al by

having the modular stanchions secured to the pallet base by a well known securing means, such as an adhesive layer using a bonding pack.
